**Re: EMVCo Letter of Approval - Contact Terminal Level 2**

**EMV Application Kernel: Infinix EMV Level2 Kernel Version V4.3g**

**Approval Number(s): 2-04166-1-1S-ICTK-0418-4.3g  
2-04166-1-1OS-ICTK-0418-4.3g**

---

The EMV Application Kernel has been tested on the following terminal

**Terminal: APPPOS**  
**PinPad: n/a**  
**Operating System: 1OS = FW Platform Version v2.0**

---

**Renewal Date: 23-Jan-2022**

**Report ID Session 1: EDT17017 - ICTK Co., Ltd.**

**Kernel Checksum:**

9b390a60
----------

**Configuration Checksum:**

Config	Vendor Config ID	Terminal	Checksum
1S		21	de6c4e12

Dear Park Sei Eun:

EMVCo, LLC ("EMVCo"), a Delaware limited liability company, has received your request for Level 2 terminal type approval for the EMV Application Kernel identified above (hereafter referred to as the "Application"). In connection with your request, we have reviewed all test file number(s) listed above.

After assessing such file(s), EMVCo has found reasonable evidence that the submitted samples of the above referenced Application sufficiently conform to EMV Integrated Circuit Card Specifications for Payment Systems, Version 4.3 of November 2011.

EMVCo hereby grants your Application EMVCo Type Approval for Terminal Level 2, based on the requirements stated in the EMV 4.3 Specifications. Please note that EMVCo may publish this letter and publicly identify your Application as an approved Application, including in EMVCo's published list of approved Applications.

EMVCo's grant to your Application is subject to and specifically incorporates (i) the General Terms and Conditions to the Letter of Approval enclosed as Exhibit A, and (ii) the Specific Terms and Conditions to the Letter of Approval attached hereto as Attachment 1. Because EMVCo's grant is subject to such limitations, including certain events of termination, you and any third parties should confirm that such approval is current and has not been terminated by referring to the list of approved Applications published on the EMVCo website ([www.emvco.com](http://www.emvco.com)).

Please note that EMVCo makes certain logos available for use in connection with an Application that has received EMVCo approval. To obtain permission to use the "EMV Approved" certification mark, please contact EMVCo to request a license agreement.

***This Letter of Approval is valid while the approval number is posted on the EMVCo website.***

EMVCo, LLC, a Delaware limited liability company

Title: EMVCo Terminal Type Approval Chair

Terminal Capabilities	Value Supported
<b>Card Data Input Capability</b>	
Manual Key Entry	No
Magnetic Stripe	Yes
IC with Contacts	Yes
<b>CVM Capability</b>	
Plaintext PIN for ICC Verification	No
Enciphered PIN for online Verification	Yes
Signature (Paper)	No
Enciphered PIN for offline Verification	No
No CVM Required	No
<b>Security Capability</b>	
Static Data Authentication and Dynamic Data Authentication	No
Card Capture	No
Combined Dynamic Data Authentication / Application Cryptogram Generation	No
<b>Transaction Type Capability</b>	
Cash	No
Goods	Yes
Services	Yes
Cash Back	No
Inquiry	No
Transfer	No
Payment	No
Administrative	No
Cash Deposit	No
<b>Terminal Data Input Capability</b>	
Does terminal have keypad	Yes
Numeric Keys	Yes
Alphabetic and Special Character Keys	No
Command Keys	Yes
Function Keys	Yes
<b>Terminal Data Output Capability</b>	
Print, Attendant (Mandatory for terminals supporting signature)	No
Print, Cardholder	No
Display, Attendant (Mandatory for Attended terminals)	Yes
Display Cardholder	No
Code Table 10	No
Code Table 9	No
Code Table 8	No
Code Table 7	No
Code Table 6	No
Code Table 5	No
Code Table 4	No
Code Table 3	No
Code Table 2	No
Code Table 1	Yes

Terminal Capabilities	Value Supported
<b>Application Selection</b>	
Support PSE selection Method	Yes
Support Cardholder Selection & Confirmation	No
Does Terminal have a preferred order of displaying applications	No
Does terminal perform partial AID selection	Yes
Does the terminal have multi language support	No
Does the terminal support the EMV Language Selection method	No
Does the terminal support the Common Character Set as defined in Annex B table 20 Book 4	Yes
<b>Selectable Kernel Configurations</b>	
Is your Multi-Configuration Kernel capable of dynamically selecting a configuration at the time of transaction	No
<b>Data Authentication</b>	
What is the maximum supported Certificate Authority Public Key Size (Mandatory for terminals supporting Data Authentication with minimal support for 248 bytes)	N/A
What exponents does the terminal support (Mandatory for terminals supporting Data Authentication, 3 and $2^{16}+1$ )	N/A
During data authentication does the terminal check validity for revocation of Issuer Public Key Certificate	No
When supporting certificate revocation, what is the Certificate Revocation List format?	
Does the terminal contain a default DDOL (Mandatory for terminals supporting DDA)	No
Is operator action required when loading CA Public Key fails	No
CA Public Key verified with CA Public Key Check Sum	No
<b>Cardholder Verification Method</b>	
Terminal supports bypass PIN Entry	No
Terminal supports Subsequent bypass PIN Entry	No
Terminal supports Get Data for PIN Try Counter	No
Terminal supports Fail CVM	Yes
Are amounts known before CVM processing	Yes
<b>Terminal Risk Management</b>	
Floor Limit Checking (Mandatory for offline only terminals and offline terminals with online capability)	Yes
Random Transaction Selection (Mandatory for offline terminals with online capability, except when cardholder controlled)	No
Velocity Checking (Mandatory for offline only terminals and offline terminals with online capability)	No
Transaction Log	No
Exception File	No
Performance of Terminal Risk Management irrespective of AIP setting (expected behavior)	Yes

Terminal Capabilities	Value Supported
<b>Terminal Action Analysis</b>	
Does the terminal support Terminal Action Codes	Yes
Can the Terminal Action Codes be deleted or disabled? If yes what are the default TAC values supported? (according to Book 3 Section 10.7)	Yes
TAC Denial:	0000000000
TAC Online:	CC00000000
TAC Default:	CC00000000
How does Offline Only Terminal process Default Action Codes prior to First Generate AC? (Offline Only Terminal shall support one option)	N/A
How does online only terminal process TAC/IAC-Default when unable to go online?	Skipped
<b>Completion Processing</b>	
Transaction Forced Online Capability	No
Transaction Forced Acceptance Capability	No
Does terminal Support advices	No
Does the terminal support Issuer initiated Voice Referrals	Yes
Does the terminal support Batch Data Capture	No
Does the terminal support Online Data Capture	Yes
Does the terminal support a Default TDOL	Yes
Default TDOL TVR bit set before or after the 1st Generate AC Terminal Action Analysis	Before
<b>Exception Handling</b>	
What is the POS Entry Mode value when IC cannot be read and the transaction falls back using Magstripe (Mandatory for attended terminals)	02
<b>Miscellaneous</b>	
Is the terminal equipped with a PIN Pad	Yes
Is the amount and PIN entered at the same keypad	Yes
Is the ICC/Magstripe Reader combined	No
If Combined ICC/Magstripe reader is supported, is Magstripe read first	No
Does the terminal support account type selection	No
Does the terminal support 'on fly' script processing (not recommended behavior)	No
Is the Issuer Script device limit greater than 128 bytes	Yes
If the Issuer Script device limit is greater than 128 bytes, what is the value supported	256
Does the terminal support Internal Date Management	No
Is the Level 2 Contact Kernel Random Generator using the algorithm described in SB144	No
If the Level 2 Contact Kernel Random Generator is not using the algorithm described in SB144, is this function PCI approved	No
If the Level 2 Contact Kernel Random Generator is not using the algorithm described in SB144, describe the function (such as algorithm used, etc)	<code>void rmarin(int ij,int kl); This is the initialization routine for the random number generator RANMAR(). The random number sequences created by these two seeds are of sufficient length to complete an entire calculation with void ranmar(float rvec[],int len); This is the random number generator to produce an array of pseudorandom numbers. This algorithm is a combination of a Fibonacci sequence and an 'arithmetic sequence'.</code>
Is the Level 2 Contact Kernel Software dependent on the Terminal Hardware	No
If answer to previous question is Yes, describe the function and the Hardware	
Are the Cryptographic functions (RSA, Hash, etc) of the Level 2 Contact Kernel Software dependent on the Terminal Hardware	No
If answer to previous question is Yes, describe the Hardware	
Is any other functions of the Level 2 Contact Kernel Software dependent on the Terminal Hardware	No
If answer to previous question is Yes, describe the functions and the Hardware	
Does the terminal support Receipt (by printing or any electronic means)?	No
List the Currency Codes supported as for ISO 4217	840

Terminal Capabilities	Value Supported
<b>Checksum</b>	
Does the product comply with the Checksum rules as defined in Contact Terminal Level 2 administrative process	Yes
This is an Initial submission or Subsequent submission or renewal of the original approved product prior to the effective date of checksum rules (cf Terminal Type Approval Bulletin No. 134)	n/a
Configuration Checksum (Static Kernel only)	de6c4e12
