

EMVCo Product Approval (IC)

Please accept this document as confirmation of the EMVCo Security Evaluation process

The ICCN number must be mentioned to all vendors or when shipping the product.
The use of the ICCN number is limited to the product as detailed below.
Please also reference the ICCN number in any communication with EMVCo.

ICCN: ICCN0267

Date ICCN issued: 06 Sep 2019

ICCN Expiry Date: 06 Sep 2022

Company: STMicroelectronics (Rousset) SAS

Master Component: ST31P450

Hardware Revision: Rev. C

Child Lot 1: ST31P320

Child Lot 2: -

Child Lot 3: -

Child Lot 4: -

Child Lot 5: -

Manufacturing site(s): ST Crolles (France) & Samsung Giheung (Korea)

Firmware name / version: FW 3.1.1 and 3.1.2

Crypto. library name / version: Optional NesLib 6.4.7

Other libraries name / version: -

Bootloader name / version: See Firmware

Security Laboratory: Thales

User Guidance: - Secure dual interface MCU with enhanced security and up to 450 Kbytes of Flash memory - ST31P450 Preliminary datasheet – DS_ST31P450 – v3.0

- ST31P450 firmware V3 - User manual – UM_ST31P450_FWv3 – v7.0

- ST31P secure MCU platform Security guidance – Application note – AN_SECU_ST31P – v2.0

- NesLib cryptographic library NesLib 6.4 – User manual – UM_NesLib_6.4 – v3.0

- ST31P secure MCU platforms NesLib 6.4 security recommendations - Application note - AN_SECU_ST31P_NESLIB_6.4 – v5.0

- ST31P secure MCU platforms NesLib 6.4 – Release Note - RN_SECU_ST31P_NESLIB_6.4.7 – v4.0

- ST31P platform random number generation – User manual –UM_ST31P_TRNG – v2.0

- ST31P platform TRNG reference implementation: compliance tests –AN_ST31P_TRNG – v1.0

Conditions of Certification: Guidance document(s) must be followed.

Disclaimer: Although the secure implementation of any security mechanisms and product functionalities may be evaluated, the EMVCo Security Evaluation Process does not validate the cryptographic algorithms, methods and protocols themselves nor the absence of flaws or defects in the specifications used for product development.

The EMVCo Security Evaluation Process is intended to provide valuable and practical information relating to the general security performance characteristics and the suitability of use for smart card related products and IC chip-based tokens. The EMVCo Security Evaluation Process is designed to ensure a robust security foundation for these products at the product family and component level. The EMVCo Security Evaluation Process is an evolving process in relation to new attack techniques and technology. EMVCo therefore reserves the right to perform new/random security testing throughout the lifetime of the card which may impact certification. The full terms and conditions upon which EMVCo Compliance Certificates are issued by EMVCo are contained in the EMVCo Security Evaluation Process Document and the EMVCo Security Evaluation Certification Contract.
